The investor is about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type

This product is a Swiss Uncertificated Security under Swiss law.

Objectives

Objective of the product is to provide the investor with a specified entitlement according to predefined conditions. The product has a fixed lifetime and will be redeemed on the Redemption Date. The possibilities for the redemption of the product are as follows:

- If a Barrier Event has not occurred and
 - If the Final Fixing Level of the Underlying with the Worst Performance is at or below the respective Initial Fixing Level multiplied by the Bonus Level (in %), the investor will receive a Cash Settlement in the Settlement Currency that equals the Bonus Amount.
 - If the Final Fixing Level of the Underlying with the Worst Performance is above the respective Initial Fixing Level multiplied by the Bonus Level (in %), the investor will receive a Cash Settlement in the Settlement Currency which equals the Denomination multiplied by the Worst Performance.
- If a Barrier Event has occurred, the Investor will receive a round number (i.e. Conversion Ratio) of the Underlying with the Worst Performance per Product. Any potential fractional Conversion Ratio entitlements (Fractions of the Underlying) will be paid in cash, based on the Final Fixing Level.

A Barrier Event shall be deemed to occur if at least one of the Underlyings' Final Fixing Levels is at or below the respective Barrier Level.

The investor might incur a loss in case the sum of the value of the delivered shares on the Redemption Date and the Fractions of the Underlying is below the purchase price of the product. Different from a direct investment in the Underlyings, the investor will not profit from dividend payments nor any further entitlements resulting from the Underlyings (e.g. voting rights). The investor will benefit from a positive performance of the Underlyings as long as the Barrier Event has not occurred.

Currency of the product (Settlement Currency)	US Dollars (“USD”)	Minimum Investment / Minimum Trading Lot	USD 1'000.00
Issue Date	21/09/2022	Initial Fixing Date	14/09/2022
Last Trading Day	14/12/2023	Redemption Date	21/12/2023
Final Fixing Date	14/12/2023	Denomination	USD 1'000.00
Issue Price	100.00%	Initial Fixing Level	An observed price of the respective Underlying on the Initial Fixing Date on the Related Exchange.
Final Fixing Level	Official close of the respective Underlying on the Final Fixing Date on the Related Exchange.	Bonus Level	130.00%
Bonus Amount	USD 1'300.00	Settlement Type	Cash Settlement or Delivery of Underlying
Worst Performance	For each Underlying the performance is calculated by dividing its Final Fixing Level by the respective Initial Fixing Level. The Worst Performance corresponds to the lowest of all such calculated values.	Currency Risk	The product is currency hedged at maturity, i.e. although the Initial Fixing Level is determined in the currency of the Underlying, the amounts determined in the Currency of the Underlying will be converted 1:1 into the Currency of the Product (Quanto)
FX Rate	The foreign exchange rate to be used for the conversion of the relevant Underlying currency into the Settlement Currency which appears on the Bloomberg page “BFI” on the Final Fixing Date at 10 a.m. local time New York, for Underlyings with the Related Exchange located in the Asia-Pacific region at 4 p.m. local time Hong Kong, respectively.

*levels are expressed in percentage of the Initial Fixing Level

**will be determined on the Final Fixing Date and equals the Denomination divided by the Initial Fixing Level of the respective Underlying which is expressed as absolute value in the relevant Underlying currency and converted where necessary into the Settlement Currency using the FX Rate.

The product terms provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the Issuer of the product may terminate the product early. These events are specified in the product terms and principally relate to the Underlying(s), the product and the Issuer of the product. For instance, these exceptional events are including but not exclusively limited to the cessation of an Underlying, tax events and the discontinuation of the Issuer's ability to carry out the necessary hedging transactions. In the event of termination, the Redemption Amount may possibly be significantly below the purchase price. Even a total loss of the investment is possible.

Intended retail investor

- The product is aimed at retail investors who intend to form private assets and have a short-term investment horizon.
- The investor can bear losses up to the total loss of the investment amount and attaches no importance to products with capital guarantee.

- **KNOWLEDGE & EXPERIENCE:** Investors who have at least one of the following characteristics: some knowledge of the financial instruments in question or moderate experience of financial markets

2. What are the risks and what could the investor get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Issuer is not able to pay the investor.

We have classified this product as 6 out of 7, which is the second-highest risk class.

This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact the capacity of the Issuer to pay the investor of the product.

The investor shall be aware of the currency risk. If the investor receives payments in a different currency, the final return that the investor gets will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so the investor could lose some or all of its investment.

In the case of delivery of the Underlying price losses may arise even after the Final Fixing Date until the Underlying is credited to the investors securities account.

If the Issuer is not able to redeem the investor what is owed, the investor could lose the entire investment.

For detailed information about all risks please refer to the risk sections of the legal documentation as specified in the section 'Other relevant information' below.

Performance Scenarios

Investment USD 10,000		1 year	21/12/2023 (Recommended holding period)
Stress Scenario	What the investor might get back after costs	USD 139.46	USD 3403.27
	Average return each year	-98.61%	-57.25%
Unfavourable Scenario	What the investor might get back after costs	USD 4937.04	USD 4971.99
	Average return each year	-50.63%	-42.35%
Moderate Scenario	What the investor might get back after costs	USD 8940.66	USD 7497.17
	Average return each year	-10.59%	-20.31%
Favourable Scenario	What the investor might get back after costs	USD 12671.36	USD 13000.00
	Average return each year	26.71%	22.98%

This table shows the money the investor could get back over the next years and on the Redemption Date under different scenarios, assuming that the investor invests USD 10,000.00.

The scenarios shown illustrate how the investor's investment could perform. The investor can compare them with scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of the product varies, and are not an exact indicator. What the investor gets back will vary depending on how the market performs and how long the investor keeps the investment/product.

The stress scenario shows what the investor might get back in extreme market circumstances, and it does not take into account the situation where the Issuer is not able to pay the investor.

The figures shown include all the costs of the product itself, but may not include all the costs that the investor pays to the advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect how much the investor gets back.

3. What happens if the Issuer is unable to pay out?

The obligations of the Issuer under this product are guaranteed by a first demand guarantee of EFG International AG, Zurich, governed by Swiss law, which protects investors in case the Issuer is unable to fulfil its obligations under the product. A total loss of the investor's capital invested is possible if both the Issuer and the Guarantor are unable to fulfil their obligations in respect of the product and the guarantee, respectively. The product is a debt instrument and as such is not covered by any deposit protection scheme.

4. What are the costs?

Cost over time

The Reduction in Yield (RIY) shows what impact the total costs the investor pays will have on the investment return the investor might get. The total costs taken into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself. They include potential early exit penalties. The figures assume the investor invests USD 10,000. The figures are estimates and may change in the future.

The person selling to the investor or advising the investor about this product may charge other costs. If so, this person will provide the investor with information about these costs, and show the investor the impact that all costs will have on the investor's investment over time.

Investment USD 10,000	If the investor cashes in the product after 1 year	If the investor cashes in at the end of the recommended holding period
Total costs	USD 135.80	USD 71.55
Impact on return (RIY) per year	1.36%	0.60%

Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return the investor might get at the end of the recommended holding period.
- the meaning of the different cost categories.

This table shows the impact on return per year			
One-off costs	Entry costs	0.60%	The impact of the costs already included in the price.
	Exit costs	-	Not applicable
Ongoing costs	Portfolio transaction costs	-	Not applicable
	Other ongoing costs	-	Not applicable
Incidental costs	Performance fees	-	Not applicable
	Carried interests	-	Not applicable

5. How long should the investor hold it and can the investor take money out early?**Recommended holding period: 21/12/2023 (until Redemption Date)**

The objective of the product is to provide the investor with the redemption profile described under "1. What is this product?" above. This only applies if the product is held until maturity.

There are no possibilities to take the investor's money out early other than to sell the product off-exchange.

Under normal market conditions, the price at which the investor may sell the product will depend on the market parameters prevailing at the time, which could put the invested amount at risk.

In unusual market situations, or in the event of technical faults/disruptions, a purchase and/or sale of the product can be temporarily hindered, or may not be possible at all.

6. How can the investor complain?

Any complaint regarding the person advising on, or selling, the product on the relevant website can be submitted directly to that person.

Any complaint regarding the product or the conduct of the Issuer of this product can be submitted to the following address: Leonteq Securities AG, Europaallee 39, 8004 Zurich, Switzerland, kid@leonteq.com, www.leonteq.com.

7. Other relevant information

Any additional documentation in relation to the product and in particular the final terms or the pricing supplement and the issuance and offering programme (including any supplements hereto) are published on the website: www.leonteq.com. In order to obtain more detailed information – and in particular details of the structure of and risks associated with an investment in the product – the investor should read these documents.
