Product Structure

Standard DOCUs are tailor-made structured products which provide for an optimized return under stable or slightly positive / negative (depending on where the Strike Level is set) market conditions, but the invested capital is at risk. The enhanced (fixed) coupon of the Product can compensate for the risk of being repaid in the Alternative Currency (full downside risk at Expiry). The amount to be redeemed on the Redemption Date depends on the redemption scenario occurred: If the Expiration Value is above the Strike Level, the Investor will receive on the Redemption Date a cash amount in the Investment Currency equal to the Investment Amount plus the Coupon Amount. Otherwise, if the Expiration Value is at or below the Strike Level, the Investor will receive on the Redemption Date a cash amount in the Alternative Currency which corresponds to the Investment Amount plus the Coupon Amount, both converted into the Alternative Currency at a rate equal to the Strike Level.

Tax Treatment

The taxation of an investment product can be complex and depends on your individual tax profile as well as on the particular product. Therefore your investment in this Product should be on the basis of your own independent tax advice from an external and reputable advisor or service provider on the consequences of purchasing and holding this investment product to its Redemption Date (including where the investment product has been bought on the secondary market) and the consequences of redeeming or selling the investment product before its Redemption Date. The following information only provides a general overview of the potential tax consequences at the time of issuance. Tax laws and practices of tax administrations may change on short notice, possibly with retroactive effect. **You as investor are solely liable for all current and future taxes and duties imposed on an investor as a consequence of an investment in this Product; UBS disclaims all liability for any such tax obligations as well as for the accuracy and completeness of the below description. This tax section does not constitute tax advice nor does UBS provide tax advice on any investment products.**

Swiss Tax Treatment

Swiss Income Tax	For Swiss tax purposes this Product is qualified as a combination of an option and a bond, where the majority of the return is in the form of a discount or a one-time payment on the Redemption Date (IUP). For private investors resident in Switzerland the increase of the bond floor* at sale or redemption respectively is subject to income tax. However, any gain derived from the option (5.4057% p.a.) is for such investors considered as capital gain and is not subject to income tax. If the product carries a negative interest at issuance, these investors can pursuant to the practice of the Swiss Federal Tax Administration neither set negative interest off against interest income nor deduct negative interest from other taxable income.
Bond floor at issue	100%*
Bond floor at redemption	100% plus interest component of the coupon (1.6765% p.a.)*
Swiss Withholding Tax	This Product is not subject to the Swiss Withholding Tax. It depends on the jurisdiction of the Issuer and the Paying Agent whether a foreign withholding tax applies.
Swiss Transfer Stamp Duty	The Product does not qualify as a taxable security (TK22/3). Transactions are not subject to Swiss Stamp Duty.

*For Products which are not denominated in Swiss Francs, the bond floor has to be converted into Swiss Francs at the prevailing exchange rate at sale or redemption and at purchase.

Classification

This Product does not represent a participation in any of the collective investment schemes pursuant to Art. 7 et seq. of the Swiss Federal Act on Collective Investment Schemes (CISA) and thus does not require an authorisation of the Swiss Financial Market Supervisory Authority (FINMA). Therefore, Investors in this Product are not eligible for the specific investor protection under the CISA. Moreover, Investors in this Product bear the issuer risk.

Furthermore, this Product does not benefit from any depositor protection under Art. 37a under the Swiss Federal Law on Banks and Savings Banks (Banking Act) or other forms of deposit insurance under any other law as might be applicable to this Product.

2. Prospects of Profits and Losses

Market Expectation	Investors in this Product expect the Underlying to trade sideways to slightly positive / negative (depending on where the Strike Level is set). In any case, Investors expect that the Underlying will not close at or below the Strike Level at Expiry.

Maximum Return	The profit potential is limited to the Coupon Amount. A maximum profit will be achieved if the Expiration Value is above the Strike Level.
Maximum Loss	There is no protection against the depreciation of the Alternative Currency versus the Investment Currency below the Strike Level at Expiry. In a worst case scenario, the Product becomes worthless and the Investor will lose all of the invested capital. However, due to the fact that the Investor receives a fixed Coupon Amount (which may, however be converted into the Alternative Currency), the potential loss in such a redemption scenario might be lower compared to a direct investment in the Underlying.

3. Significant Risks for Investors

General risk warning	Potential Investors should understand the risks associated with an investment in the Product and shall only reach an investment decision after careful considerations with their legal, tax, financial and other advisors of (i) the suitability of an investment in the Product in the light of their own particular financial, fiscal and other circumstances; (ii) the information set out in this document; and (iii) the Underlying(s). The following is a summary of some of the most significant risks. Further risks are set out in the General Terms and Conditions.
Risk Tolerance	Investors in this Product should be experienced Investors and familiar with derivative products and the foreign-exchange and precious metals markets. Although Investors benefit from a predefined coupon payment, they must be willing to make an investment that is fully exposed to the depreciation of the Alternative Currency versus the Investment Currency below the Strike Level at Expiry.

Product specific risks

Loss Potential	Investors may lose some or all of their investment as they are fully exposed to the depreciation of the Alternative Currency versus the Investment Currency below the Strike Level at Expiry.
Capital at Risk	Yes
Risk Potential in comparison to a direct investment in the Underlying	The risk potential is similar to a direct investment in the Underlying.
Issuer Call right	None
Stop Loss Event	None
Market risks	The value of a Product is determined not only by changes in the value of the Underlying(s), but also by a number of other market price influencing factors. Since several market price influencing factors may have simultaneous effects on the Product, the effect of a particular factor cannot be predicted. In addition, several market price influencing factors may have a compounding effect which may not be predictable. These factors include, inter alia, the remaining time to expiration of the Product, the frequency and intensity of price fluctuations (volatility) of the Underlying(s), as well as the prevailing interest rate. A decline in the value of the Product may therefore occur even if the level of the Underlying remains constant or increases.
Extraordinary termination risk	The Product contains terms and conditions that allow the Issuer to terminate and redeem the Product prior to the Redemption Date. In case of such extraordinary termination, the Issuer shall pay to each Investor an extraordinary termination amount as determined by the Calculation Agent which is usually equivalent to the market value of the Product. Potential Investors should note that the extraordinary termination amount may deviate from and may be considerably below the amount which would be payable pursuant to the final redemption provisions on the Redemption Date. Investors are not entitled to request any further payments on the Product after the termination date. Please refer to the General Terms and Conditions for a detailed description.
Adjustment risk	Potential Investors should be aware that it cannot be excluded that certain events occur or certain measures are taken (by parties other than the Issuer) in relation to the Underlying(s) which can lead to changes to the Underlying(s) or its/their concept. In the case of the occurrence of such events or measures, the Issuer and/or the Calculation Agent are entitled to effect adjustments according to the General Terms and Conditions. Such adjustments might have a negative impact on the value of the Product.

Illiquidity risk in secondary market	<p>The Issuer or the Lead Manager, as applicable, intends, subject to actual market conditions and the transaction size, to provide bid prices for this Product upon request. However, the Issuer or the Lead Manager, as applicable, makes no firm commitment to provide bid prices for this Product, and assumes no legal obligation to quote any such prices or with respect to the level or determination of such prices.</p> <p>Potential Investors therefore should not rely on the ability to sell this Product at a specific time or at a specific price. Potential Investors should note that prices quoted typically include a spread and therefore may deviate from the market value of the Product. Hence, Investors might sell at a price considerably lower than the actual price of the Product at the time of its sale.</p> <p>Potential Investors should note that there is generally no secondary market for the Product and in case a secondary market develops there is no assurance that it will continue. By selling the Product in the secondary market Investors may receive less than the capital invested.</p> <p>In case of a secondary market transaction, there is a possibility that costs, including taxes, related to or in connection with the Product may arise for Investors that are not paid by the Issuer or imposed by the Issuer.</p>
Disruption risk	<p>Investors are exposed to disruption events (such as price source disruption events, settlement disruption events or FX disruption events) which could have an impact on the redemption amount through delay in payment, change in value or suspension of trading in the Product. For a detailed description of such events and their effects please refer to the General Terms and Conditions.</p>
Effects of structuring and product management	<p>When the Product is issued or sold, several types of incidental costs, fees, commissions and profits are included in the purchase price of the Product. Such incidental costs and fees may include (i) issuance and securitisation costs; (ii) hedging costs and brokerage fees incurred by the Issuer in connection with the issuance of the Product; (iii) a profit priced into the Issue Price for the benefit of the Issuer; (iv) commissions paid internally from one department to another department (e.g. sales department) of the Issuer; (v) distribution fees to intermediaries, brokers or other distributors and financial advisors; (vi) other costs incurred by the Issuer in connection with the issuance of the Product (including, without limitation, costs for external legal and tax advice). Such costs reduce the value of the Product in the sense that a potential bid price will exclude such costs and therefore is likely to be lower than the Issue Price or offer price of the Product.</p>
Risks related to payments in precious metals or foreign currencies	<p>Investors should be aware that payments in precious metals or foreign currencies may have unfavourable tax or other financial consequences. Furthermore, it may be prohibited or restricted for certain Investors to directly hold and/or sell any of the precious metals or foreign currencies to be delivered or paid according to the terms of the Product. Neither the Issuer nor any other Agent assumes any responsibility to monitor, anticipate or control whether a specific Investor is entitled to hold and/or sell any of the precious metals or foreign currencies to be delivered or paid according to the terms of the Product and shall not be liable for any damages that may occur due to the holding or on-selling of any of such precious metals or foreign currencies.</p> <p>Furthermore, any precious metals or foreign currencies to be delivered or paid to the Investors under the Product will only be delivered or paid to Investors that maintain a precious metals or foreign currency account. Should the relevant Investor not maintain such account, neither the Issuer nor the Paying Agent will have any obligation to pay any cash amounts or deliver any substitute amount to such Investor in lieu of such precious metals or foreign currencies. As the physical delivery of the precious metals or foreign currencies will be effected by way of credit entry to the relevant precious metals or foreign currency account, the respective Investor will be exposed to the credit and further risks relating to the relevant entity such account is held with.</p>
Withholding tax	<p>Investors in this Product should note that any payment under this Product may be subject to withholding tax (such as, inter alia, Swiss Withholding Tax, and/or withholding related to FATCA or 871(m) of the US Tax Code). Any payments due under this Product are net of such tax. Please refer to the General Terms and Conditions for detailed information. If the Issuer is required to withhold any amount pursuant to Section 871(m) or FATCA of the U.S. Tax Code, the Issuer will not be required to pay additional amounts with respect to the amount so withheld.</p>

Risk Factors relating to the Issuer

In addition to the market risk with regard to the development of the Underlying(s), each Investor bears the general risk that the financial situation of the Issuer could deteriorate. The Products constitute immediate, unsecured and unsubordinated obligations of the Issuer, which, particularly in case of insolvency of the Issuer, rank *pari passu* with each and all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of those that have priority due to mandatory statutory provisions. The general assessment of the Issuer's creditworthiness may affect the value of the Products. This assessment *inter alia* depends on the ratings assigned to the Issuer or its affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's.

The Issuer Ratings indicated in this document reflect the situation at the time of issuance and may be subject to changes. The actual Issuer Ratings can be accessed on the Issuer's website (www.ubs.com) under "Analysts & Investors".
